

ecomagic!

EcoMagic - The world's most fuel efficient hot air balloons.

Ultramagic are proud to introduce a unique range of EcoMagic balloons made with a specially developed insulation fabric **aerofabrix®**. This fabric is available exclusively in hot air balloons designed and manufactured by Ultramagic.

EcoMagic balloons have a lightweight insulation layer of **aerofabrix®** fabric inside in addition to special silver fabric on the outside. After many hours of testing and development and delivering the initial production models, limited orders are now being taken for these very special balloons.

**Do you need something special? EcoMagic?
